SUMMARY

Raphael Sena is a software developer who evolved from hands-on IT support to building and modernizing large-scale mobility and ERP systems. After an initial international experience studying in Sydney, he began his career in Service Desk/Help Desk roles, developing a strong foundation in troubleshooting, networking, hardware, and corporate support. This customer-focused technical background eventually led him to software engineering. Today, he works as a Fullstack Engineer at Modaxo (Empresa 1) on electronic ticketing and transport revenue management platforms—delivering mobile apps used across several Brazilian cities and contributing to modernization efforts with Flutter and Java/Spring. Alongside his professional work, he develops personal projects, combining a product mindset with fullstack execution in mobile, backend, frontend, and cloud/devops. He is also a Software Engineering student at PUC Minas (2023–2027), continuously strengthening his engineering fundamentals while applying this knowledge in production environments and side projects using **Java**, **Angular**, **PostgreSQL**, and **Docker**.

EXPERIENCE

- **Modaxo - Empresa 1** Belo Horizonte, MG - Brazil
Software Engineer May 2025 – Present
 - **General (All Projects):** Directly working with **SQL** and legacy **Java** versions for data manipulation, and using **Liquibase** for database versioning and automated migrations across all ecosystem systems.
 - **Sigom Cloud Project:** Fullstack Developer (Java 1.8, Spring Boot, AngularJS). Optimized PIX payment report generation, reducing the estimated computational effort from **20M–1T to 1M** operations for high data volumes.
 - **SIGO Project:** Maintenance and evolution of an electronic ticketing app (C#/Xamarin and Java/Spring Boot). System used in several metropolitan regions, impacting more than **177,000 users**.
 - **SIGO 2.0 Project (Modernization):** Implemented a **white-label** architecture using **5 distinct flavors** in Flutter/Dart. Performed full integration with **Firebase** and Java/Node.js services, and configured data infrastructure with **Big Query** for real-time analysis. Implemented health monitoring via **Crashlytics** and advanced event tracking for product metrics. Produced business intelligence dashboards using **Looker Studio** and **Google Analytics**.
- **AVASO Technology Solutions** Belo Horizonte, MG - Brazil
Field Support Engineer Sep 2023 – May 2025
 - **Service Desk (Freelance):** Provided technical support in English for a multicultural user base. Diagnosed, researched, and resolved issues in desktops, laptops, VMs, smartphones, servers, backup systems, VoIP devices, and peripherals. Performed equipment installation and configuration, and updated ticketing system documentation for tracking and reporting.
- **Sociedade Mineira de Cultura** Belo Horizonte, MG - Brazil
IT Technician Sep 2021 – Sep 2023
 - **Service Desk & Help Desk:** Configured and verified networks on desktops and laptops. Inspected and installed hardware. Performed maintenance on PCs and laptops. Provided L1 technical support using Active Directory, ticketing systems (CSC), VPN, and directory/printer mapping platforms, following established SLA standards. Collaborated on a telephony transition project for over 100 users, migrating logical networks to VoIP and configuring/installing equipment.

EDUCATION

- **Pontifical Catholic University of Minas Gerais** Belo Horizonte, MG - Brazil
Bachelor of Software Engineering Jul 2023 – Jul 2027
 - **Research Project:** Member of a research group advised by Prof. Lucila Ishitani, focused on publishing a paper regarding Productivity in Software Engineering.
 - **2x Interdisciplinary Project Champion:** Led award-winning teams in high-impact software projects with real-world applications.
 - **Experimental Software Agency - PMMG:** Serving as **Tech Lead**, leading a team to build the scope of the HR recruitment software for the Military Police of Minas Gerais, impacting over **40,000 candidates** per public examination.

PROJECTS

- **raphaelsena.com:**
 - **Portfolio:** Personal portfolio introducing myself and highlighting my work.
 - **Technologies:** TypeScript, Next.js, React, TailwindCSS
- **Hangout!:** 
 - **Featured Project:** Award-winning Web and Mobile platform developed for event ticketing.
 - **Technologies:** Flutter, Dart, Java, Spring Boot, PostgreSQL, Docker, TypeScript, Next.js, React, TailwindCSS, Microservices, Ngrok
- **Remediar:**  
 - **Featured Project:** Award-winning ERP platform developed for NGO Remediar, an organization focused on medicine donation.
 - **Technologies:** Java, Spring Boot, PostgreSQL, Docker, TypeScript, Next.js, React, TailwindCSS, Microservices, Nginx, Local Deployment, Linux, CI/CD
- **DressManager:** 
 - **Project:** Web application for managing a dress store inventory and sales.
 - **Technologies:** Java, Spring Boot, PostgreSQL, Docker, TypeScript, Next.js, React, TailwindCSS

SKILLS

- **Programming Languages:** Java, TypeScript, C#, Node.js, Dart, SQL
- **Frontend:** HTML, CSS, React, Next.js, Angular, TailwindCSS
- **Mobile & Cross-platform:** Flutter, Xamarin
- **Backend & Frameworks:** Spring Boot, Node.js
- **Databases:** Oracle, PostgreSQL, MySQL, SQLite
- **DevOps & Cloud:** Docker, Cloudflare, Linux, GitHub Actions
- **Observability:** Firebase, Zipkin, Grafana, Prometheus
- **Messaging & Cache:** RabbitMQ, Redis

LANGUAGES

- **English** (C1 - Advanced) | **German** (B1 - Intermediate) | **Spanish** (A2 - Elementary) | **Portuguese** (Native)
